

**In Pain and Swelling Associated with Fracture, Trauma and Injury**

# Aceeta-S™

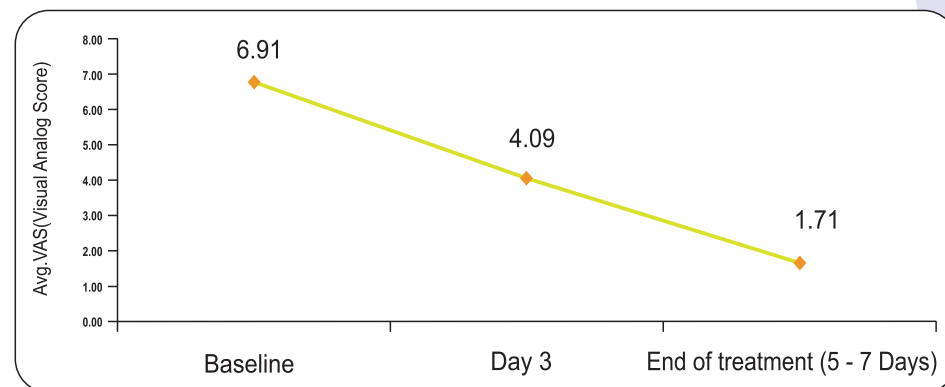

Aceclofenac 100 mg., Paracetamol 325 mg. & Serratiopeptidase 15 mg Tablets

**Strikes out Pain & Traumatic Swelling**

**Clinical efficacy endorsed by multiple specialties in > 1000 Indian patients<sup>3</sup>**

## Serratiopeptidase edges over other proteolytic enzymes

- Superior anti-inflammatory action as compared to Trypsin / Chymotrypsin<sup>1</sup>
- Similar anti-inflammatory action as that of Bromelain but Bromelain rapidly deactivates after absorption<sup>2</sup>

- **Significant improvement in pain**

VAS is decreased from 6.91 to 1.71

- **Significant improvement in inflammation**

92% patients showed effective reduction in swelling

89% patients showed effective reduction in redness
